BRL Espaces Naturels
Beauty for the places we live in

- Many years of experience in landscape and garden design and maintenance
- €8 million turnover
- A 100-strong workforce for the parks and gardens in the region
- Highly trained, skilled, responsive personnel, attentive to our customers’ needs
- A wide range of plants all environmentally grown and recycled green waste...
- Solutions even for the most complex projects
- All our activities are ISO 9001 certified

BRL Espaces Naturels is the BRL Group’s “green fingers” subsidiary company delivering services for community authorities, developers, businesses and private individuals. A hundred skilled personnel are dedicated to enhancing our world and surroundings.

BRL Espaces Naturels, entirely ISO 9001 certified, offers a complete range of services to improve its clients’ living conditions and solve even the most complex problems: designing and caring for parks and gardens, transplanting and trimming very large trees, recycling green waste and controlled watering.

Our services

Audit, design and creation
BRLEN offers a wide range of expertise (plant heritage auditing, landscape studies, assessment, design and creation) backed up with sound experience on public and private sector projects.

Plant production and sale
Les Pépinières BRL, our plant nurseries, which produce “Sud de France” labelled plants, are one of the largest producers of ornamental plants and Mediterranean species in Occitanie. Located in the Gard, they feature 10 hectares of container plants, including 10 000 m² greenhouses, and 40 hectares of field-grown trees and shrubs. Every year, they supply over a million young plants and seedlings, 600 000 containers and 50 000 trees, to buyers in France and elsewhere in Europe.

Works and maintenance
Our crews, two units, one in Montpellier and one in La Grande Motte, are specialised in planting, automatic watering systems, gardening and landscape maintenance, trimming and scrub-clearing.

Some of their significant experience: ZAC Marianne estate (Montpellier-winner of the Victoires du paysage 2014 landscape design award), greenery and gardens at Odysseum and along the tramway in Montpellier, landscape design for private grounds (Les Vautes in Saint-Gely-du-Fesc and numerous parks and private gardens), recreational complexes such as Le Crès lake, Parc du Levant in Palavas-les-Flots, Parc St Hubert in Juvignac and Parc Laporte, a huge wooded park in Castelnau le Lez, creation and maintenance of gardens and grounds in industrial and business estates and maintenance of urban area greenery, e.g. 120 hectares in La Grande-Motte, etc.
